DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Weller. Weller discloses a sheet folding and accumulation device that includes a folding mechanism (see col. 4, line 56); a saddle (90); and an inverting mechanism (40).
3. Claims 1-12 and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Muller (US 3,897,051). Muller discloses discloses a sheet folding and accumulation device that includes a folding mechanism (26); a saddle (30); and an inverting mechanism (28).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 17 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mebus in view of Muller. ~~Mebus discloses a method of accumulating sheets that includes folding a~~ sheet with the peak of the fold pointing upward (50); inverting the sheet (14); and forming a stack on a saddle (22). Mebus discloses all the limitations of the claims, but it does not disclose binding the stack. However, Muller discloses binding a stack of sheets for the purpose of

forming a booklet. It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Mebus by utilizing a binder for the purpose of forming a booklet.

Allowable Subject Matter

6. Claims 13, 14, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
